## Classroom Management

### Interactive Teaching

#### Screen Broadcast

- Broadcast the teacher's screen to the selected students.
- Use Screen Pen to annotate the important part on the screen.
- Switch between window display and full screen of students.
- Students can take screenshots to record the important part.
- Students can rotate the received screen to fit his/her device.

#### Response & Competition

- Conduct a quick response to the selected students.
- Support three different competition modes.
- The first student who presses the responder to answer the question, and the teacher grades the answer manually. (First to answer)
- Students type in their answers, and get graded automatically. (Enter an answer)
- The first student who presses the responder will get his/her screen demonstrated to the others automatically, and the teacher grades it manually. (First to demo)
- Divide students into different groups and start the response.
- Set thinking time and answering time for students.
- Use an award system to assess the performance of each student.

#### Student Demonstration

- Select one student and demonstrate his/her screen to the selected students.
- Monitor the demonstrating student.
- Switch between window display and full screen for the students receiving demonstration.

#### Interactive Whiteboard

- Create a blank whiteboard or import pictures as drawing board.
- Use provided tools to draw on the drawing board and share the drawing board with students.
- Invite one or more students to draw on the same drawing board together.
- Students can draw on their own drawing boards
- Monitor and select one student to demonstrate to others when they draw individually.
- Switch display mode of whiteboard between window display and full screen.
- View whiteboard history, and the teacher can export history information.
- Import or export the whiteboard files in the form of iwboard.

# Effective Management

## Monitor & Control

- Monitor and control students remotely.
- Automatically monitor all the students with a customized individual display time.
- The teacher can control the selected student's device.
- Switch display mode between window display and full screen.
- Teacher can rotate the received students' screen to fit his/her device.
